ELECTRICAL INSTALLATION

Theory and Practice

E. L. DONNELLY

A.M.A.S.E.E. Dip. Econ. (Oxon.)

City and Guilds Full Technological Certificate

Principal Lecturer, Middlesex Polytechnic

Third Edition

Nelson Thornes

Contents

Definitions and Formulae ix

1 *Ohm's Law and Electric Power* 1

Nature of electricity – Electrical units – Calculation of resistance – Ohm's law – Voltage and current in series and series–parallel circuits – Electric power – Exercises and answers

2 *Conductors and Cables* 20

Insulators and conductors – Construction of cables – Resistivity – Temperature coefficient – Terminations – Outline of I.E.E. Regulations – Exercises and answers

3 *Conduit, Trunking, and Ducting* 38

Types of conduit – Installing conduit – Trunking systems – Ducting – Catenary wiring – Outline of I.E.E. Regulations – Exercises

4 *Distribution and Control* 54

Regulations governing supply – British supply system – Layout of domestic and industrial installations – Temporary installations – Exercises

5 *Testing and Earthing* 70

Verification of polarity – Tests of effectiveness of earthing – Earth electrodes – Earth insulation resistance – Outline of I.E.E. Regulations – Exercises

6 *Protection* 87

Electromagnetism – Circuit breakers – Fuses – Thermal trip – Exercises

7 *Electric Heating* 98

Electrical and mechanical units – Efficiency – Water heaters – Space heating – Electric cookers – Tariffs – Exercises and answers

8 *Bells and Indicating Systems* 108

Types of bells – Indicators – The relay – Telephone – Exercises

9 *Batteries* 117

Leclanché cell – Internal resistance – Lead-acid cell – Alkaline cell – Methods of charging – Exercises and answers

10 *Measuring Instruments* 130

Moving-iron types – Moving coil – Shunts and multipliers – Insulation resistance tester – Ohmmeter – Wattmeter – Energy meter – Exercises and answers

11 *Direct Current Generators and Motors* 139

Construction and operation – Field systems – Starting and control – Losses – Faultfinding – Outline of I.E.E. Regulations – Exercises and answers

12 *Alternating Current* 157

Values of a.c. – Resistance, inductance, and capacitance – A.C. power – Power factor correction – Exercises and answers

13 *Alternating Current Generators and Motors* 175

Construction and operation – Starting – Single-phase motors – Faultfinding – Exercises

14 *Transformer* 184

Self and mutual inductance – Construction and operation – Losses – Cooling – Outline of I.E.E. Regulations – Exercises and answers

15 *Rectification* 193

Half and full-wave rectification – Diode and double diode valves – Mercury arc rectifier – Metal rectifiers – Thyristor

16 *Illumination* 200

Terms – Inverse square law – Cosine law – Incandescent lamp – Low-pressure mercury vapour lamp – High-pressure mercury vapour lamp – Sodium discharge lamp – Neon discharge lamp – Photometer – Exercises and answers

17 *Prevention of Accidents* 213

Main causes – First aid – Accident book

18 *Fixing* 218

Motor fixing – Fixing in brickwork – Hollow partitions

Appendix 223

Selection of cables

Index 225
